

INSPIRING SOLUTIONS

GLOBAL MARKET FOCUS

Delivering worldwide solutions that address the testing, training and integrated operational needs of government and commercial customers. Bringing a wealth of knowledge, experience, and strategic partnerships with a winning portfolio of cutting-edge simulation capabilities and technologies.

INNOVATION FOCUS

Committed to your success, we continually invest in our people, products, and services. Leading the way by integrating new technology, virtualized solutions, and world-class support. Dedicated to developing our team members and technology for the future.

RELATIONSHIP FOCUS

Taking the journey with you. We work with our customers as a partner in your success. From initial contact, delivery, and through sustainment we are there, without question.

QUALITY FOCUS

Certified AS9100D aerospace and defense industry company with over 30 years of serving the military training and simulation community.

CAPABILITIES STATEMENT

PLEXSYS Interface Products, Inc. (PLEXSYS) is a world leader in computer modeling and simulation (M&S). We provide solutions globally that address training and operational needs of government and commercial markets. We leverage our industry knowledge, experience, and partnerships with a suite of cutting-edge capabilities and innovative technologies. We are committed to continually enhancing our customer's success and investing in our people, products, and services.

WHY PLEXSYS?

Our simulation software ecosystem focuses on providing high fidelity training and testing for the Live, Virtual and Constructive (LVC) environments. In addition to innovative software solutions and systems engineering, PLEXSYS delivers:

- Extensive portfolio of commercial software solutions
- Customized training courseware for software solutions
- Customized simulation systems/mission training centers
- Subject matter experts and simulation system operators
- Consulting services for simulation support
- Tailored interface design and process controls

PLEXSYS provides instruction, daily technical support, and operates the simulation equipment to provide the richest possible M&S environments for government agencies, joint and coalition warfighters, as well as commercial customers.

SOLUTIONS

- M&S Framework
- Simulation Cybersecurity
- Create and Control Simulation Environments
- Capture and Analyze for Brief/Debrief
- Communicate (LVC)
- Advanced Displays

SERVICES

- Software Engineering
- System Integration
- Innovation
- Operations/Logistics Support
- Product Support
- Project Management
