vadaar®2

Stream, record, and review your actions

Introducing VADAAR 2 –
Seamless Multimedia Streaming Management

Unlock the power of VADAAR 2, a cutting-edge software solution revolutionizing the way you interact with video, audio, and data across the globe. Engineered for distributed environments, VADAAR 2 transforms your training and simulation experiences across diverse sectors, including defense, emergency management, education, and more.

Key Advantages:

Universal Accessibility: Stream, record, and review content seamlessly from any device, anywhere, anytime. VADAAR 2's user-friendly interface ensures synchronization across all sources, providing effortless access to your content on any device.

Hardware-Free Efficiency: No more expensive hardware investments. VADAAR 2 enhances cost-effectiveness by seamlessly integrating with your existing IT infrastructure through straightforward setup applications.

Remote Monitoring Made Easy: Monitor live or recorded content remotely using any web browser on your computer, tablet, or mobile phone. With VADAAR 2, location is no longer a barrier to staying connected and informed.

Enhanced After-Action Review: Whether for training or operations, VADAAR 2 is your go-to tool for after-action review. Utilize the Monitor and Debrief mode to gain unparalleled insights with a flexible audio-visual canvas.

Precision Playback and Debriefing: Play, fast-forward, rewind, and frame-step recordings from multiple sources with perfect synchronization. Uncover a multidimensional understanding of actions and create precise teaching moments during debriefing with customizable bookmarks and notes.

FEATURES

VADAAR 2 consists of three applications:

Sender

- Add Sender to your devices to send video, audio and data.

- Real-time capture of video, audio, RTSP and UDP data including DIS.

- GPU encoding and H.264 compression for minimal footprint on existing systems.

Viewer

- View your media with Viewer.

- Play/pause, fast forward, rewind and frame step your media.

- Compatible with ImmersaView SimVisuals for seamless display walls.

Server

- Web based user interface for centrally managing your VADAAR 2 environment.

- Simple to set-up scenes of streams, videos, audio and images.

- Add bookmarks to your media.

- Administer security settings and role based access control for users and resources.

- Integrates with other simulation tools such as PLEXSYS's ASCOT, sonomarc, and DPA.
